1 About this user guide

Important: For important information on the safe use of your device and battery, read “Product and safety information” before you take the device into use. To find out how to get started with your new device, read the user guide.

2 Get started

KEYS AND PARTS

Your phone

This user guide applies to the following models: TA-1538, TA-1551, TA-1546, TA-1553, TA-1547, TA-1555.

- | | |
|-------------------------|------------------------|
| 1. Microphone | 6. Flashlight |
| 2. Call key | 7. Headset connector |
| 3. Left selection key | 8. Right selection key |
| 4. Scroll key | 9. Power/End key |
| 5. Earpiece/Loudspeaker | 10. USB connector |

Some of the accessories mentioned in this user guide, such as charger, headset, or data cable, may be sold separately.

Note: You can set the phone to ask for a security code to protect your privacy and personal data. The pre-set code is 12345. To change the code, select **Menu** > **Settings** > **Security** > **Phone locked**, create a code with 4-8 digits, and select **OK**. Note, however, that you need to remember the code, as HMD Global is not able to open or bypass it.

Parts and connectors, magnetism

Do not connect to products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved for use with this device, to the audio connector, pay special attention to volume levels.

Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic stripe cards near the device for extended periods of time, since the cards may be damaged.

SET UP AND SWITCH ON YOUR PHONE

Nano-SIM

Important: This device is designed to be used with a nano-SIM card only. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

Note: Switch the device off and disconnect the charger and any other device before removing any covers. Avoid touching electronic components while changing any covers. Always store and use the device with any covers attached.

Open the back cover

1. Place your fingernail in the small slot at the bottom of the phone, then lift and remove the cover.
2. If the battery is in the phone, take it out.

Insert the SIM cards

1. Slide the SIM card in the SIM card slot.
2. If you have a dual-SIM phone, slide the second SIM in the SIM2 slot.

Both SIM cards are available at the same time when the device is not being used, but while one SIM card is active, for example, when making a call, the other may be unavailable.

Tip: To find out if your phone can use 2 SIM cards, see the label on the sales box. If there are 2 IMEI codes on the label, you have a dual-SIM phone.

Insert the memory card

1. Slide the memory card in the memory card slot.
2. Put back the battery.
3. Put back the back cover.

Use only compatible memory cards approved for use with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

Tip: Use a fast, up to 32 GB microSD memory card from a well-known manufacturer.

Switch on your phone

Press and hold .

CHARGE YOUR PHONE

Your battery has been partially charged at the factory, but you may need to recharge it before you can use your phone.

Charge the battery

1. Plug the charger into a wall outlet.
2. Connect the charger to the phone. When done, unplug the charger from the phone and then from the wall outlet.

If the battery is completely discharged, it may take several minutes before the charging indicator is displayed.

Tip: You can use USB charging when a wall outlet is not available. The efficiency of USB charging power varies significantly and it may take a long time for charging to start and the device to start functioning.

KEYPAD

Use the phone keys

- To see your phone's apps and features, select **Menu** on the home screen.
- To go to an app or feature, press the scroll key up, down, left or right. To open an app or feature, press the scroll key.
- If you have selected the zoomed menu view, press the scroll key up or down to go to an app or feature. To open an app or feature, press the scroll key.

Lock the keypad

To avoid accidentally pressing the keys, lock the keypad: select  > **Lock keypad**. To unlock the keypad, press , and select **Unlock** > .

Type with the keypad

Press a key repeatedly until the letter is shown.

To enter a space press **0**.

To type a special character or punctuation mark, select  > **Insert options** > **Insert symbol**.

To switch between character cases, press **#** repeatedly.

To type a number, press and hold a number key.

3 Calls, contacts, and messages

CALLS

Make a call

Learn how to make a call with your new phone.

1. Type in the phone number. To type in the + character, used for international calls, press * twice.
2. Press the call key. If asked, select which SIM to use.
3. To end the call, press the end key.

Answer a call

Press .

CONTACTS

Add a contact

1. Select **Menu** > **Contacts** >  > **New**.
2. Select where to save the contact.
3. Select **Last name**, write the name, and select .
4. Select **First name**, write the name, and select .
5. Select **Mobile** or **Home number**, type in the number, and select .
6. Select .

Save a contact from the call logs

1. Select **Menu** > **Call logs**, and select the call type.
2. Scroll to the number you want to save, select  > **Add to contacts**, and select **Add to new contact** to create a new contact, or **Add to existing contact** to add the number to a contact in your contacts list.
3. Select where to save the contact.
4. Add the contact details and select .

Call a contact

You can call a contact directly from the contact list.

Select **Menu** > **Contacts**, scroll to the contact you want to call, and press the call key.

SEND MESSAGES

Write and send messages

1. Select **Menu** > **Messages** > **Create message**.
2. Write your message.
3. To insert numbers or symbols to the message, select **≡** > **Insert options** > **Insert number** or **Insert symbol**.
4. Select **≡** > **Send**. If asked, select which SIM to use.
5. Type in a phone number, or select **Search** and a recipient from your contacts list.
6. Select **OK**.

You can send text messages that are longer than the character limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly. Characters with accents, other marks, or some language options, take more space, and limit the number of characters that can be sent in a single message.

4 Personalise your phone

CHANGE THE LOOK OF YOUR HOME SCREEN

Choose a new wallpaper

1. Select **Menu** > **Settings** > **Display** > **Wallpaper settings**.
2. Select **Static wallpaper** to select from pre-defined wallpapers, or **More pictures** to select a picture from your phone or memory card.
3. Scroll to the wallpaper you want and select **Select**.

PROFILES

Set a profile

There are several profiles that you can use in different situations. There is, for example, a silent profile for when you cannot have sounds on and an outdoor profile with loud tones.

1. Select **Menu** > **Settings** > **Profiles**.
2. To adjust a profile, scroll to it, and select **≡** > **Settings**. Change the settings you want.
3. To set on a profile, scroll to it, and select **Select**.

ADD SHORTCUTS

You can add shortcuts to different apps and settings on your home screen.

Edit Go to settings

On the bottom left of your home screen is , which contains shortcuts to various apps and settings. Select the shortcuts that are the handiest for you.

1. Select **Menu** > **Settings** > **Phone settings** > **Go to settings**.
2. Select **Select options**.
3. Scroll to each shortcut you want to have on the list and select **Mark**.
4. Select **✓** > **Yes** to save the changes.

You can also reorganise your list.

1. Select **Organise**.
2. Scroll to the item you want to move, select **Move** and where you want to move it.
3. Select **← >** **Yes** to save the changes.

5 Clock, calendar, and calculator

SET THE TIME AND DATE MANUALLY

Change the time and date

1. Select **Menu** > **Settings** > **Phone settings** > **Time & date**.
2. Select **Update time settings** and switch **Auto update time** off.
3. Select **Manual update time** and enter the time and date.
4. Select ←.

ALARM CLOCK

Set an alarm

1. Select **Menu** > **Alarm**.
2. Select  and enter the alarm time and other details.
3. Select .

CALENDAR

Add a calendar event

1. Select **Menu** > **Extras** > **Calendar**.
2. Scroll to a date and select  > **Add new schedule**.
3. Enter the event details, and select .

CALCULATOR

Use the calculator

1. Select **Menu** > **Extras** > **Calculator**.
2. Enter the first factor of your calculation, use the scroll key to select the operation, and enter the second factor.
3. Press the scroll key to get the result of the calculation.

Select  to empty the number fields.

6 Erase your phone's data

REMOVE PRIVATE CONTENT FROM YOUR PHONE

If you buy a new phone, or want to dispose of or recycle your old phone for any other reason, here's how you can remove your personal info and content. Note that it is your responsibility to remove all private content.

Restore factory settings

1. To reset your phone to its original settings, select **Menu** > **Settings** > **Phone settings** > **Restore factory settings** > **Full restore (delete data)** .
2. Enter your security code, or if you haven't changed the code, enter the pre-set code 12345.
3. Select **OK** > **Yes** .

7 Product and safety information

FOR YOUR SAFETY

Read these simple guidelines. Not following them may be dangerous or against local laws and regulations. For further information, read the complete user guide.

SWITCH OFF IN RESTRICTED AREAS

Switch the device off when mobile device use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals, or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

AUTHORISED SERVICE

Only authorised personnel may install or repair this product.

BATTERIES, CHARGERS, AND OTHER ACCESSORIES

Use only batteries, chargers and other accessories approved by HMD Global Oy for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

If your device is water-resistant, see its IP rating in the device's technical specifications for more detailed guidance.

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

EMERGENCY CALLS

! **Important:** Connections in all conditions cannot be guaranteed. Never rely solely on any wireless phone for essential communications like medical emergencies.

Before making the call:

- Switch the phone on.
- If the phone screen and keys are locked, unlock them.
- Move to a place with adequate signal strength.

To place an emergency call on any screen, press key number 5 for 4 seconds.

1. Press the end key repeatedly, until the home screen is shown.
2. Type in the official emergency number for your present location. Emergency call numbers vary by location.
3. Press the call key.
4. Give the necessary information as accurately as possible. Do not end the call until given permission to do so.

You may also need to do the following:

- Put a SIM card in the phone.
- If your phone asks for a PIN code, type in the official emergency number for your present location, and press the call key.
- Switch off the call restrictions on your phone, such as call barring, fixed dialling, or closed user group.

TAKE CARE OF YOUR DEVICE

Handle your device, battery, charger, and accessories with care. The following suggestions help you keep your device operational.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits.
- Do not use or store the device in dusty or dirty areas.
- Do not store the device in high temperatures. High temperatures may damage the device or battery.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.
- Do not open the device other than as instructed in the user guide.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device or the battery. Rough handling can break it.
- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can prevent proper operation.
- Keep the device away from magnets or magnetic fields.
- To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important information.

During extended operation, the device may feel warm. In most cases, this is normal. To avoid getting too warm, the device may automatically slow down, close apps, switch off charging, and if necessary, switch itself off. If the device is not working properly, take it to the nearest authorised service facility.

RECYCLE

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Electrical and electronic products contain a lot of valuable materials, including metals (such as copper, aluminium, steel, and magnesium) and precious metals (such as gold, silver, and palladium). All of the materials in the device can be recovered as materials and energy.

CROSSED-OUT WHEELIE BIN SYMBOL

Crossed-out wheelie bin symbol

The crossed-out wheelie-bin symbol on your product, battery, literature or packaging reminds you that all electrical and electronic products and batteries must be taken to separate collection at the end of their working life. Remember to remove personal data from the device first. Do not dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority, or read about HMD's take-back program and its availability in your country at www.hmd.com/phones/support/topics/recycle.

BATTERY AND CHARGER INFORMATION

Battery and charger information

To check if your phone has a removable or non-removable battery, see the printed guide.

Devices with a removable battery Only use your device with its original rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.

Devices with a non-removable battery Do not attempt to remove the battery, as you may damage the device. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, take the device to the nearest authorised service facility to have the battery replaced.

Charge your device with a compatible charger. Charger plug type may vary. Charging time can vary depending on device capability.

Battery and charger safety information

Once your device is fully charged, unplug the charger from the device and electrical outlet. Please note that continuous charging should not exceed 12 hours. If left unused, a fully charged battery will lose its charge over time.

Extreme temperatures reduce the capacity and lifetime of the battery. Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. A device with a

hot or cold battery may not work temporarily. Note that the battery may drain quickly in cold temperatures and lose enough power to switch off the phone within minutes. When you are outdoors in cold temperatures, keep your phone warm.

Obey local regulations. Recycle when possible. Do not dispose as household waste.

Do not expose the battery to extremely low air pressure or extremely high temperature, such as disposing of it in a fire, as that may cause the battery to explode or leak flammable liquid or gas.

Do not dismantle, cut, crush, bend, puncture, or otherwise damage the battery in any way. If a battery leaks, do not let the liquid touch the skin or eyes. If this happens, immediately flush the affected areas with water or seek medical help. Do not modify, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre or your phone dealer before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors. Do not charge your device during a lightning storm. When charger is not included in the sales pack, charge your device using the data cable (included) and a USB power adaptor (may be sold separately). You can charge your device with third-party cables and power adaptors that are compliant with USB 2.0 or later and with applicable country regulations and international and regional safety standards. Other adaptors may not meet applicable safety standards, and charging with such adaptors could pose a risk of property loss or personal injury.

To unplug a charger or an accessory, hold and pull the plug, not the cord.

Additionally, the following applies if your device has a removable battery:

- Always switch the device off and unplug the charger before removing any covers or the battery.
- Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery. This may damage the battery or the other object.

SMALL CHILDREN

Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

MEDICAL DEVICES

Operation of radio transmitting equipment, including wireless phones, may interfere with inadequately shielded medical devices' function. Consult a physician or the medical device's manufacturer to determine if it is adequately shielded from external radio energy.

IMPLANTED MEDICAL DEVICES

To avoid potential interference, manufacturers of implanted medical devices (such as cardiac pacemakers, insulin pumps, and neurostimulators) recommend a minimum separation of 15.3 centimeters (6 inches) between a wireless device and the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimeters (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.
- Switch the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

HEARING

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

PROTECT YOUR DEVICE FROM HARMFUL CONTENT

Your device may be exposed to viruses and other harmful content. Take the following precautions:

- Be cautious when opening messages. They may contain malicious software or otherwise be harmful to your device or computer.
- Be cautious when accepting connectivity requests or browsing the internet. Do not accept Bluetooth® connections from sources you do not trust.
- Install antivirus and other security software on any connected computer.
- If you access preinstalled bookmarks and links to third party internet sites, take the appropriate precautions. HMD Global does not endorse or assume liability for such sites.

VEHICLES

Radio signals may affect improperly installed or inadequately shielded electronic systems in vehicles. For more info, check with the manufacturer of your vehicle or its equipment. Only authorized personnel should install the device in a vehicle. Faulty installation may be dangerous and invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable or explosive materials in the same compartment as the device, its parts, or accessories. Do not place your device or accessories in the air bag deployment area.

POTENTIALLY EXPLOSIVE ENVIRONMENTS

Switch your device off in potentially explosive environments, such as near gasoline pumps. Sparks may cause an explosion or fire resulting in injury or death. Note restrictions in areas with fuel; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive environment may not be clearly marked. These usually are areas where you are advised to switch your engine off, below deck on boats, chemical transfer or storage facilities, and where the air contains chemicals or particles. Check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity.

CERTIFICATION INFORMATION

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields), recommended by international guidelines from the independent scientific organisation, ICNIRP. These guidelines incorporate substantial safety margins that are intended to assure the protection of all persons regardless of age and health. The exposure guidelines are based on the Specific Absorption Rate (SAR), which is an expression of the amount of radio frequency (RF) power deposited in the head or body when the device is transmitting. The ICNIRP SAR limit for mobile devices is 2.0 W/kg averaged over 10 grams of tissue.

SAR tests are carried out with the device in standard operating positions, transmitting at its highest certified power level, in all its frequency bands.

This device meets RF exposure guidelines when used against the head or when positioned at least $\frac{5}{8}$ inches (1.5 centimetres) away from the body. When a carry case, belt clip, or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above stated separation distance from the body.

To send data or messages, a good connection to the network is needed. Sending may be delayed until such a connection is available. Follow the separation distance instructions until the sending is finished.

During general use, the SAR values are usually well below the values stated above. This is because, for purposes of system efficiency and to minimise interference on the network,

the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output, the lower the SAR value.

Device models may have different versions and more than one value. Component and design changes may occur over time and some changes could affect SAR values.

For more information, go to www.sar-tick.com. Note that mobile devices may be transmitting even if you are not making a voice call.

The World Health Organisation (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, they recommend you limit your usage or use a hands-free kit to keep the device away from your head and body. For more information and explanations and discussions on RF exposure, go to the WHO website at www.who.int/health-topics/electromagnetic-fields#tab=tab_1.

Please refer to www.hmd.com/sar for the maximum SAR value of the device.

ABOUT DIGITAL RIGHTS MANAGEMENT

When using this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights. Copyright protection may prevent you from copying, modifying, or transferring photos, music, and other content.

COPYRIGHTS AND OTHER NOTICES

Copyright
